

Oil Filter Crusher

The KK Hydraulics team in Tralee bring years of experience in waste processing and handling, with primary emphasis in hydraulic and pneumatic compaction equipment used to reduce waste volume. We can also offer our customers a full line of containers.

CKS20 Oil Filter Crusher

Our CKS20 Oil Filter Crusher is part of our range of heavy duty crushing equipment for recycling automotive oil filters, heavy duty and industrial oil filters as well as used oil. The CKS20 Oil filter Crusher is a durable, reliable heavy-duty machine that will meet your specifications and stand the test of time. The popular CKS20 unit is pneumatically powered, simple to operate and compact with a 20 Ton capacity. The unit is ideal for crushing heavy duty truck and machinery oil filters. The filter crushing chamber is large enough to accommodate filters up to 400mm (16") tall and 178mm (7") in diameter. The CKS20 is also ideal for crushing one gallon paint cans or multiple car oil filters

Key Benefits

- Pneumatic powered, is very quiet, and provides consistent crushing force
- Can accommodate a large drum directly under the machine to catch used oil
- Steel construction and the best pneumatic and hydraulic components available – tough and reliable
